What is claimed is:

Claims 1 - 4 (Canceled).

Claims 5 - 18 (Withdrawn).

Claims 19 - 34 (Canceled).

35. (Currently amended) ~~The~~ An eyewear lens system of claim 34,  
said system comprised of at least one rotator, wherein said  
rotator is comprised of a turning member.

36. (Currently amended) The eyewear lens system of claim 35,  
said ~~lens~~ system further comprising a peripheral member and a  
peripheral edge, said peripheral member engaging said  
peripheral edge, said turning member being attached to said  
peripheral member.

37. (Currently amended) ~~The~~ An eyewear system of claim 35  
comprising at least one rotator wherein rotator comprised of a  
turning member; said eyewear system further comprising at one  
memory member.

38. (Currently amended) An eyewear lens, said lens comprising  
an anchor cut-out said cut-out having an opening area and an  
inner area, said inner area being wider than said opening area.

Claims 39 - 45 (Withdrawn).

46. (Currently amended) A configurable eyewear system, said  
eyewear system comprising at least one containment structure and

at least one lens, said at least one lens being rotatable within said containment structure, said eyewear system further comprising at least one rotator, said at least one lens being rotatable at least by said rotator, wherein said eyewear system is in a group of headwear consisting essentially of ~~sunglasses,~~ welder's eyewear, motorcycle rider eyewear, safety eyewear, skydiving eyewear,, airplane pilot eyewear, ~~deep sea diving eyewear,~~ gas mask eyewear, hazardous materials eyewear, 3-d glasses, costumes, masks, goggles, hoods, UV tanning eyewear, racecar driver eyewear, astronaut eyewear, sports eyewear, hoods and helmets.

47. (Previously presented) The configurable eyewear system of claim 46, said eyewear system further comprising at least one turning member, said at least one lens being rotatable at least by said turning member.

48. (Previously presented) The configurable eyewear system of claim 47, wherein said at least one lens further comprises a peripheral edge, said peripheral edge further having a lens bezel, and wherein said containment structure further has an interior surface, said lens bezel being mated with said interior surface, and said lens bezel being rotatable within said interior surface.

49. (Previously presented) The configurable eyewear system of

claim 47, said at least one lens further comprising a peripheral area, said turning member attached to said peripheral area of said lens.

50. (Previously presented) The configurable eyewear system of claim 47, wherein said at least one lens is attached to at least one peripheral member, said turning member being attached to said peripheral member, and wherein said at least one lens further comprises a peripheral edge, said at least one peripheral member engaging said peripheral edge.

51. (Previously presented) The configurable eyewear system of claim 47, wherein said containment structure further comprises at least one containment stop member, said at least one stop member impacting said turning member, wherein said stop member stops said turning member from rotating past said stop member.

52. (Previously presented) The configurable eyewear system of claim 46, wherein said lens has at least two optical portion

53. (Previously presented) The configurable eyewear system of claim 52, wherein said lens has a first optical portion and a second optical portion, said first optical portion being different than said second optical portion.

54. (Previously presented) The configurable eyewear system of claim 53, wherein said first optical portion is a majority of said lens and said second optical portion is a minority of said

lens.

55. (Previously presented) The configurable eyewear system of claim 53, wherein said first optical portion has a first prescription, and said second optical portion has a second prescription.

56. (Previously presented) The configurable eyewear system of claim 55, wherein said second prescription is a multi-focal lens.

57. (Previously presented) The configurable eyewear system of claim 46, said eyewear system further comprising at least one memory member.

57. (currently amended) ~~The~~ A configurable eyewear system of claim 46 comprising at least one containment structure and at least one lens, at least one lens rotatable within said containment structure, said eyewear system further comprising at least one rotator, said at least one lens being rotatable at least by said rotator; said eyewear system further comprising at least one memory member, wherein said eyewear system is in a group of headwear consisting of welder's eyewear, motorcycle rider eyewear, safety eyewear, skydiving eyewear, airplane pilot eyewear, gas mask eyewear, hazardous materials eyewear, 3-d glasses, costumes, masks, goggles, hoods, UV tanning eyewear, racecar driver eyewear, astronaut eyewear, sports

eyewear, hoods and helmets.

58. (Previously presented) A configurable eyewear system, said eyewear system comprising at least one containment structure and at least one lens, said at least one lens being rotatable within said containment structure, said eyewear system further comprising at least one rotator, said at least one lens being rotatable at least by said rotator, said eyewear system further comprising at least one memory member, said lens being rotatable at least by said memory member.

59. (Previously presented) The configurable eyewear system of claim 58, said lens further comprising an anchor cut-out said memory member being attached to said lens at said anchor cut-out.

60. (Previously presented) The configurable eyewear system of claim 58, wherein said memory member is attachable to said lens, said memory member being able to be in a resting configuration and in at least one stretched configuration, said at least one lens having an at rest position and at least one rotated position, said at least one lens being automatically rotatable from said at least one rotated position toward said at rest position when said memory member transforms from said at least one stretched configuration toward said resting configuration.

61. (Previously presented) The configurable eyewear system of claim 60, said eyewear system further comprising at least one
